

*Manufacturer and distributor of
snow removal and de-icing equipment*

*The brand of quality
— **SINCE 1976** —*

DESIGNED TO HANDLE THE MOST DEMANDING OF NEEDS

H20 HITCH

LOW-PROFILE HITCH FOR LIGHT TRUCKS ONLY*

- Tubular steel construction to endure severe snow removal conditions
- Mounts close to chassis to reduce stress on front axle
- Stress created from snow plowing operations is transmitted back along the chassis frame rails to reduce pressure on hitch and from axle

*Ensure the capacity of axles

MODEL NUMBER	WEIGHT	CABLE FRONT POST	HYDRAULIC FRONT POST
H20 - Basic	300 lbs	-	-
H20-FFH30 - With Front Post	500 lbs	-	✓
H20QC - Quick Detach	600 lbs	-	-
H20QC-FFH30 - With Front Post	700 lbs	-	✓

H345LM HITCH

LOW-PROFILE HITCH DESIGNED FOR ALL CHASSIS EXCEPT 4 x 4s

- Low mount style hitch that enables the truck hood to be tilted forward at all times without having to detach hitch or plow
- For safety, cylinder and lift arm can be tucked within the hitch when plow is detached
- Utilizes 4" diameter x 10 1/2" stroke double acting lift cylinder with nitrated piston rod

MODEL NUMBER	WEIGHT	CABLE FRONT POST	HYDRAULIC FRONT POST
H345LM-25x51 - Basic	450 lbs	-	-
H345LM-25x51-FW-R - With right wing attachment	600 lbs	-	✓

H345 HITCH

DESIGNED FOR ALL CHASSIS

- Rugged elevated style hitch with built-in steel bumpers
- Recommended whenever a chassis is to be equipped with a combination from plow and side wing system
- Complete hitch (and side wing post if applicable) can be easily tilted forward through the removal of two (2) pins - allows the truck hood to open
- Front wing post is supported by two (2) 5" x 3" x 3/8" rectangular steel tubes and 4" x 3" x 3/8" angle iron

MODEL NUMBER	WEIGHT	CABLE FRONT POST	HYDRAULIC FRONT POST
H345 - Basic	525 lbs	-	-
H345-FW-R - Right wing attachment	575 lbs	✓	✓
H345-FW-FW - Right and left wing attachment	635 lbs	✓	✓

H345QC HITCH

DESIGNED FOR ALL CHASSIS

- Quick coupler system that offers several advantages over conventional type hitches
- Connect / disconnect snow plow through activation of lift cylinder – the operator does not have to leave cab
- Secure plow hitch through lower hydraulic locking pin
- Hinged upper section of QC hitch can be hydraulically lowered from the cab to enable truck hood to tilt forward

H345QC-FW-R

POSSIBILITIES THAT ARE VIRTUALLY UNLIMITED

MEDIUM DUTY TRIP EDGE REVERSIBLE PLOW

IDEAL FOR URBAN USE, INCLUDING PARKING LOTS, ALLEYS, ETC.

- Available in steel or weight saving Tenelene.
- Lightweight design makes it ideal for operating with low GVW type chassis.
- Reversible plow can be rapidly transferred to 1, 2 or 3 section bottom trip edge as required. Adjustment necessitates simple attaching/detaching of 2 bolts.
- 2 curb shoes and 2 moldboard shoes are standard.

MODEL NUMBER	MOLDBOARD MATERIAL	CLEARING PATH	CUTTING EDGE	OVERALL LENGTH	OVERALL HEIGHT	WEIGHT

HEAVY DUTY TRIP EDGE REVERSIBLE PLOW

IDEAL FOR URBAN AND RURAL USE

- Available in steel or weight saving Tenelene.
- Designed for extreme snow removal operations.
- Unique bottom section trip edge design permits fast spring tension adjustment and replacement.
- Compression spring design offers superior safety as compared to other makes of bottom trip edge plows which utilize a pre-torqued torsion type spring system.
- Moldboard curvature designed to reduce snow blow back during high speed operations.
- Moldboard pitch adjustment.

FKC REVERSIBLE SNOW PLOW WITH "C" SHAPED MOLDBOARD

EXCEPTIONAL MOLDBOARD CONTOUR FOR EFFECTIVE SNOW REMOVAL AT ALL PLOWING SPEEDS

- Unequalled moldboard support structure permits snow clearing operations in the most severe conditions, including high snowfall accumulation roadways.
- Full moldboard safety trip mechanism – upon encountering road obstructions, the complete moldboard extends forward through 2 trip arm assemblies.
- Each trip arm utilizes a heavy duty compression spring, forcing the moldboard to return to its original plowing position after passing the road obstruction.

"TWIST AND SHOOT" REVERSIBLE PLOW

COMBINES ALL THE ADVANTAGES OF A ONE-WAY PLOW AND A REVERSIBLE PLOW

- Weight saving Tenelene moldboard..
- Unique design permits utilization at any plowing speed and in every type of snow clearing condition.
- Adjust shape of moldboard according to climatic conditions:
 - One way profile for right side discharge and superior snow casting.
 - One way profile for left side discharge and superior snow casting.
 - Consistent moldboard height for right or left side discharge.

UNBEATABLE IN SNOW

At Tenco, we've been building snowplows for close to 40 years. Ambassadors in our field, we've created a product with unique features that offer the kind of efficiency our competitors just can't match. Designed for high-speed snow clearing, Tenco's one-way plow casts snow even further.

Advantages of Tenelene moldboards:
non-corrosive material
and a slick surface to prevent
snow from adhering to plow

Steel moldboard
(shown in this photo)

FEATURES

(Standard on all One Way Plow)

- Roll formed moldboard for better snow dispersal
- Increased curvature along upper section to minimize snow blow back
- Cutting edge supported by sturdy backer angle
- Adjustable moldboard pitch
- Drive frame designed to withstand the rigors of severe snow removal conditions
- Safety caps on compression springs - full moldboard trip models only
- Height adjustable drive frame shoes

- Tencoloc swivel bar
- Quick tach swivel bar
- Stainless steel moldboard available for certain models

OPENING THE DOOR TO A WORLD OF POSSIBILITIES

Wing moldboards are available in steel or corrosion resistant Tenelene material

FRONT SIDE WING SYSTEM

- Side wing moldboards are supported by 3/8" thick full height steel ribs.
- 4" x 6" x 5/8" thick steel backer angle makes the wing ideal for use in the most severe snow removal conditions.
- Lead section of wing moldboard includes a 1" thick steel plate for attachment to front post hinge.
- Upper and lower push arms attach to moldboard through a floating adapter to allow the wing to follow the contours of the road surface.

MID MOUNT SIDE WING SYSTEM

Maneuver with precision

A side wing is an easy addition to any chassis already equipped with a standard dump body, conventional spreader or combination dump body/spreader. Tenco's dual lift design—through a cylinder in the front post and the rear push arm lift cylinder—offers superior control and greater precision when raising or lowering the wing.

Extendable lower push arms available as an option

REAR SIDE WING SYSTEM

Increase total clearing width

Easily adaptable to fit the trucks in your existing fleet, the rear mount side wing is an excellent add-on to an underbody scraper that acts like a scraper extension.

WING TRAVEL POSITIONER: A virtually indispensable option

A wing travel positioner increases the driver's field of vision by tucking under the passenger window when not in use, and reduces the risk of accident.

* Model TCW-9T-30-N-R Tenelene wing moldboard to suit low pro style chassis' can only be used in combination with H20 front post and FAF3LP rear post assembly.

OPTION : stainless steel moldboard available for certain models.

TACKLE THE TOUGHEST TASKS

900 SERIES UNDERBODY SCRAPER

Every component of the 900 Series scraper has been meticulously designed to withstand the most severe road maintenance tasks encountered year round.

- 1' thick one-piece unnotched rotating plate
- Lift cylinder/trip spring canisters are retained by 8 1/4" x 8 1/4" 4-bolt flanges
- Two (2) 4" diameter double acting reverse cylinders are protected by a cross-over relief valve
- Reversing cylinders are attached to rotating plate through 2" pivot pins
- Safety mechanism

700 SERIES UNDERBODY SCRAPER

(one way underbody scraper with air springs)

For operator safety, a dual air bag system cushions the impact upon encountering road obstructions. Independently controls the pressure of each air bag for maximum efficiency when scraping hard packed snow and ice – especially on uneven road surfaces.

The result of continual innovation in underbody scraper technology!

- In-cab control console provides a unique air springs down pressure adjustment mechanism and is included with the underbody scraper.
- Cutting edge is supported by a boxed section consisting of two (2) 3/8" thick formed Brinell 400 steel plates and a 1 1/4" X 4 1/4" flat bar.
- Scraper is raised and lowered through a 2 1/2" diameter x 9" stroke double acting cylinder.
- 1" thick moldboard is supported by seven (7) 5/8" thick Brinell 400 steel plates.
- Ample ground clearance when scraper is in travel position.

REAR SCRAPER ULTRA HEAVY-DUTY

- Hydraulic lift angle model to facilitate clearance
- 8' 4" clearing width
- Push frame consisting of two (2) 3 1/2" x 3 1/2" x 3/8" tubular levers, a 4" x 6" x 5/8" angle section and multiple strategically placed ribs
- Two (2) 4" x 12" x 1 1/2" hydraulic cylinders
- One (1) protection valve in the return line
- One (1) accumulator (nitrogen) for cushioning

ONE BODY, 2 DIFFERENT USES

Ideal for snow removal contractors and some municipalities, these super heavy duty spreaders slide easily into and out of an existing dump body to help you get the most out of your equipment.

Slide-in Spreaders are available in 201 and 304 stainless steel.

*with chute

Slide-in Spreaders, V-Box

- 10 gauge steel hopper sides, tailgate and front panel.
- 3/16" thick steel conveyor section and floor.
- Fully welded steel construction.
- Optional top screens.
- D667X self-cleaning pintle chain.
- Optional 304 & 201 stainless steel construction throughout.
- Available cross conveyor, except on model TCD-2-AS.

SPREADERS THAT GO THE DISTANCE

XE Frame Mounted Spreaders

- Choose from a multitude of configurations – rear discharge, front discharge or front left and/or right side discharge utilizing a cross conveyor.
- Chain tension is through easily adjustable grease cylinder.
- Chute constructed from combination polyethylene and stainless steel to prevent rust.
- Spreader attached to chassis through Aeon rubber helper springs to reduce shock and vibration.
- Top screens and access ladder are standard components.
- 24" wide main conveyor D88K chain rated @ 49,000 lbs.
- 7.7 cu in main conveyor hydraulic motor.
- Side panel is gradually sloped to ensure smooth and uninterrupted flow of material onto main conveyor.
- Lowest center of gravity in spreader industry.
- Chain tension is easily adjusted through grease cylinder.
- Significant weight savings as compared to competitive versions of 12 cu yd spreaders.
- Modern engineering techniques ensures spreader shape eliminates potential stress points – spreader will last much longer than traditional designed sanders.

Fenders are also available in steel.

XE Model

AVAILABLE OPTIONS

- Various types of ladders, grab handles, lighting systems (including MTQ/QMT version).
- Automated spreader controllers.
- Pre-wet system including two (2) 300 litres (80 US gallons) liquid tanks.

Multiple lights options

Plastic fender & LED lights

12 urethane discs between spreader and chassis frame reduces vibration.

The unique Triflex three points mounting system

XD chassis mount spreader with rear tailgate and front lift hoist for dumping capabilities

- Hopper is provided with tailgate to enable removal of load upon completion of material spreading.
- Utilizes existing front lift telescopic hoist on truck to attach to spreader.
- Fully welded steel construction.
- Spreader also available in 304 stainless steel.
- Rear or front center discharge configurations.

XD Model

THE ONLY INTERCHANGEABLE MODEL ON THE MARKET

Quick cycle time to remove dump body from chassis and replace with this particular type of hopper spreader.

VERSATILE, RELIABLE, AND MULTITASKING

Tenco's U-COMBO body combines all the features of a dump body and a spreader in one. Available in a range of models, the U-COMBO allows you to spread abrasive from both sides of the truck, as well as from the rear. With this type of body, switching from dump to spread mode is as easy as child's play.

- Unique body structure ensures consistent, uninterrupted material flow to main conveyor.
- The ability to spread material on both sides (front right or front left).
- The ability to spreading material from the rear or the front with easy control within the truck cab.
- The ability to carry a minimum of 200 gallons of liquid for the pre-treatment of roads.

Available in Standard Mild Steel & Hardox 450 Steel.

AVAILABLE IN A MULTITUDE OF CONFIGURATIONS

Optional pre-wet liquid tanks* installed inside fenders for protection.

Optional pre-wet liquid tanks* installed below cabshield.

Main conveyor is driven through planetary drive mechanism utilizing a 10 cu in displacement motor and 2" diameter driveshaft.

*Tanks are constructed from long lasting polyethylene material.

OFTEN IMITATED, BUT NEVER EQUALLED

- A** Floor strength ensures an even lift from side tilt cylinders. Eliminates the necessity of a 50/50 flow divider. Side tilt cylinders are equipped with a nitrated rod. Hinged conveyor cover remains with body at all times.
- B** Six (6) panel tailgate includes 3/16" thick Brinell 450 steel. Full width tailgate enables 12M body to undertake all dump body functions.
- C** Floor rotates on 1 3/4" hard induction chromed hinge shaft for superior strength.
- D** Long members of 10" I-Beam @ 25.4 lb/ft. STANDARDS.
- E** Bolt-on floor with 3 greasing points on single axle, 4 greasing points on tandem axle.
- F** Floor and conveyor cover is constructed from 3/16" thick Brinell 450 steel.
- G** Honeycomb type floor under structure creates a material shedding design.

PRE-WETTING
SYSTEM

OPTIONS

- Sides and front panel manufactured from Brinell 450 steel
- Aluminum tailgate
- Electronic spreader control
- Coal chute door (1, 2, or 3 as needed)
- Rear tailgate lateral opening (barn door)
- Bolt-on apron
- Pre-wetting system with 160 gallon tank installed under cabshield
- Summer chute
- Special paint
- Hydraulically actuated discharge chute
- Screens
- Lights in rear corner posts
- Extended greasing points on floor hinge (3 or 4)
- Sides, front panel and tailgate constructed from 304 stainless steel
- Hinged, fold-up type ladder

MAINTENANCE INNOVATION

LOW CENTER OF GRAVITY

- A** Load is substantially diminished before requiring activation of side tilt mechanism.
- B** Full capacity of body is utilized.
- C** Rapidly convert from dump to spread mode by adjusting hinged conveyor cover.

A HEAVY-DUTY PARTNER FOR LIGHT TRUCKS

By combining the reliability of our products with weight reduction technology, we created the perfect equipment to allow light trucks to carry out heavy-duty work.

- Side tilt combination dump body spreader
- One way snow plows and trip edge reversible snow plows
- "Reverse-a-way" one way moldboard with reversing drive frame
- Front- or rear-mount side wing systems

HUSKY COMBINATION DUMP BODY/SPREADER

Available in either mild steel or 304 stainless steel. Multi-Purpose Body is able to perform dump body functions year round and transform into a salt/sand spreader within minutes.

HUSKY ONE WAY AND REVERSIBLE SNOW PLOWS

MODEL TCP-10-T-36-E1

Trip edge reversible snow plow

- 9' and 10' wide Tenelene versions
- 10' steel version
- 36" high moldboard

MODEL TCO-10T-47-SR

Full trip one way snow plow

- 9'2" clearing path
- Lightweight Tenelene moldboard
- 26" intake

FRONT-MOUNT SIDE WING SYSTEM

REAR-MOUNT SIDE WING SYSTEM

- Increases clearing path of low GVW snow fighting vehicle clearing width as required.
- Lightweight design includes Tenelene side wing moldboard
- Full hydraulic front and rear post

MODEL NUMBER	INSIDE WEIGHT	SIDE HEIGHT	TAILGATE HEIGHT	WATER LEVEL CAPACITY	WEIGHT (APPROX.)

TCB-10-L-DG-S-LF	10'	18"	24"	4.07 cu yds	3400 lbs

FAST AND ECONOMICAL

IT CAN DO THE WORK OF TWO SNOW PLOWS

Adapts to any road width and clears snow at high speed, where two snow plows are usually required. Ideal for highways and airports.

TRANSVERSAL INCLINATION ANGLE

A central oscillation system allows the blade to follow the road profile.

ROTATION

Rotation angle from +32 ° to -32°.

POLYURETHANE INSERT

Fitted between the steel scraping edge and the blade it offers the elimination of any vibrations and the rotations of scraping edge when obstacles are encountered with automatic return to the working position once these have been exceeded.

LED LIGHTS FOR BACKLIGHTING

At the left and right plough ends, it is used to increase the rear clearance visibility of the plough.

3 LANE SPREADING

MATERIAL SAVING WITH THE ONE AND ONLY GILETTA SPREADER

Our spreader for medium and heavy trucks has a high load carrying capacity, and a spreading width of up to 24 meters. Can be quickly installed in your dump bodies, making them more versatile.

FEEDING SYSTEMS

UH

METAL BELT

The feeding system is realized by metal belt with cross-bars. The chain is guided by toothed pinions that enable a constant traction, maintaining a correct translation synchrony, without skidding.

UK

RUBBER BELT

The feeding system is realized by a double layer natural rubber belt with polyester and nylon core. The traction roller that moves the rubber belt is crowned to avoid side deviations and tired to minimize skidding.

UP

AUGER

The feeding system is realized by an auger with variable pitch turns that is designed to assure a continuous feeding of the material and a standardized emptying of the hopper. The auger is finished with a special paint treatment to provide lasting protection against the corrosion.

ECOSAT¹⁰

Latest generation microprocessor controlsystems, with maximum flexibility in programming and visualizing the different spreading parameters: width, asymmetry and dosage depending on the vehicle speed.

Six different tools in all-in-one control box

WORKING SCHEME

- A** PVC hopper folding cove
- B** Grid
- C** Polyethylene water proof box for electronic power pack and proportional valves block
- D** Ladder
- E** Spreading group (solid / liquid)
- F** Transverse roller/breaker
- G** Feeding system (chain, rubber belt or auger)
- H** Lightning plate

MAIN OPTIONS ON REQUEST

C3

ASYMMETRY

Electric regulation of spreading asymmetry in 5 pre-set positions from the driver's cab.

M2

SECOND DISC

Second spreading disc to increase the salt and/or brine spreading width.

U12/N

SPRAYER BAR

Spraying bar through pressure nozzles for the spraying of 100% of the brine.

M5

LATTER

AISI 304 stainless steel ladder for easy accessibility positioned in the rear right part.

T1

PVC HOPPER COVER

PVC hopper folding cover manually opened from the ground with steel structure.

G1

GRID

Galvanized grid. Possibility of AISI 304 stainless steel grid (opt. G1/X).

A GREATER BREADTH OF EXPERTISE

TENCO'S EXPERTISE NOW EXTENDS TO MANUFACTURING SNOWBLOWERS FOR LOADERS.

Our in-depth knowledge of airport snow removal needs served us well in developing these high-performance machines. No matter what the task at hand, they'll get the job done in record time.

TCS-172 Model

TC-202 Model

Vohl Tenco Model/
VOHL DV-4000

Tenco snowblowers boast integrated safety features and impressive snow removal capacity, with a casting distance between 40 feet (12 metres) through the spot casting chute and 150 feet (45 metres) through the impeller casing.

POWER TRAIN SYSTEM

- Automatic engine shutdown for low oil pressure, high engine temperature and low coolant level
- Clutch engagement at low engine RPM's only
- Emergency stop button on control panel
- Inability to start engine if clutch is already engaged

Options:

Carbide skates | Carbide cutting edge | Residential muffler* | Two (2) working lights* | Hydraulically extendable truck loading chute | Steering vanes* | Hi-tensile steel liner for impeller and chute: Trimay for TCS-172 & 202/ chromium carbide for DV-4000

*Standard on DV-4000

WATERING HAS NEVER BEEN SAFER OR EASIER THAN THIS

Thanks to its extendable arm and directional nozzle that can bypass obstacles, the PCL-500 offers a clean, safe, and efficient way to hose down sidewalks and water flowers in hanging baskets on lamp posts.

Benefit from Tenco's expertise as North America's only manufacturer of watering arms.

**THE PCL-500 WATERING ARM
is an Exclusive Tenco Patent Product**

PCL-500 TENCO WATERING ARM

- Add a reliable piece of equipment to your tanker truck.
- The PCL-500 arm is the safest and most reliable equipment on the market.
- Flexibility allows the arm to move around obstacles such as park benches, garbage cans, etc.
- The powerful PCL-500 allows cleaning the streets with the water flow controlled by the directional nozzle.
- Can be used for spraying chemicals on trees, flowers, and lawns.
- Other possible uses with the PCL-500 is watering winter exterior skating rinks.
- Entirely hydraulic components.

In cab control

TENCO, one of North America's most highly-renowned companies founded in 1976, is a manufacturer and distributor of snow removal and de-icing equipment.

TENCO offers:

- a complete range of snow removal and de-icing equipment
- reliable, superior-quality equipment
- unparalleled customer service through a network of more than 80 distributors worldwide
- a vast parts inventory

TENCO Inc. also distributes various other products, including:

- Self-propelled snowblowers
- 21-ft runway sweepers
- Dump bodies
- Giletta spreaders (GPS control and symmetrical spraying)
